Tips

Fun with Sight Words

- 👉 Have a sight word scavenger hunt. Write the sight words on sticky notes or taped cards. Place them around a room or the whole house. Have your child find them and read them.
- 👉 Have your child write the words in fun ways using chalk, paint, foam, in sand, etc. (Make it a different experience by letting them do it with something they hardly get to use.)
- 👉 Make a sight word hopscotch game and have your child read the word their bean bag lands on.

Pad

Free Online Resources

Check out this Phonics song on Youtube!

- 📺 The link below has a video about letter names and sounds. These two are key in helping your child learn to read.

Thinking Outside The Box

Does your child struggle with counting items?

- 📖 Make a bead bracelet with 5, 10, 15, 20, etc. beads. (Use the closest number to where your child struggles.) Let them wear it and count it wherever you go.
- 📖 Make a parking lot with an old car board box. Write numbers on the space and some toy cars. Have your child match them up and tell you how many cars are in the lot. Pull some out and ask again. Repeat.

Activity To Try

Lacing Plates

- 👉 Make lacing plates by using a paper plate, a marker, hole punch, and some string (yarn works well).
- 👉 Write numbers around the edge of the plate (i.e. 0-10, 11-20). Punch holes near each of the numbers.
- 👉 Tie the string around the plate at the starting place. Have your child weave the string in and out following the correct order of the numbers.
- 👉 *You can make them check it themselves if you have lines drawn where the string should be going. *
